Features include live loaded Smart Stem seals through 2”, a redundant body seal design, anti-static protection and locking safety handles. Hex head cap screws join end connections to the tapped center section. Special body and trim materials available.

- Fire safe to API 607
- Designed in accordance with ASME B16.34
- ISO 5211 Secure Mount actuator top flange

7000 & 8000 SERIES

Specifically designed for high purity applications. The ball and end connections have the same I.D. as the tube piping system. Valves come standard with 20 RA maximum (SFV-1) surface finishes and all are solution cleaned and bagged. Features include live loaded Smart Stem seals through 2½” and locking safety handles.

- Comply with ASME BPE
- USP Class IV soft goods
- ISO 5211 (½”–2”) Secure Mount actuator top flange

3 PIECE – STANDARD END CONNECTIONS

For custom end connections contact your Flow-Tek representative.

| Pressure Ratings | F15: ASME Class 150  
F30: ASME Class 300 |

Features include live loaded Smart Stem seals through 2”, anti-static protection and locking safety handles. Larger sized valves feature trunnion-type ball support. Special body and trim materials available.

- Can be furnished Fire safe to API 607
- Designed in accordance with ASME B16.34
- Face to face ASME B16.10 long pattern
- ISO 5211 Secure Mount actuator top flange

## RF15 & RF30 Series

<table>
<thead>
<tr>
<th>Body</th>
<th>1 Piece</th>

</tr>
</tbody>
</table>
| Pressure Ratings | RF15: ASME Class 150  
RF30: ASME Class 300 |

These end entry flanged valves feature live loaded Smart Stem seals through 2”, anti-static protection and locking safety handles. Special body and trim materials available.

- Can be furnished Fire safe to API 607
- Designed in accordance with ASME B16.34
- Face to face ASME B16.10 short pattern
- ISO 5211 Secure Mount actuator top flange

## Trunnion Series

<table>
<thead>
<tr>
<th>Body</th>
<th>2 Piece Cast or 3 Piece Forged</th>

</tr>
<tr>
<td>Pressure Ratings</td>
<td>ASME Class 150, 300, 600, 900, 1500</td>
</tr>
</tbody>
</table>

Trunnion Series valves are ideal for heavy duty applications such as oil and gas production, power and waste water industries. Standard design features include double block & bleed, stem & seat grease fittings, body cavity drain, vent ports and self relieving spring energized seats. Special body and trim materials available.

- Can be furnished Fire safe to API 607
- Designed in accordance with API 6D
Multi-Port ball valves offer a wide range of flow patterns: 90° and 180° T & L port 3-way balls, and 90°, 180° and 270° 4-way balls. Features include a 4th seat to prevent leakage and maintain proper ball alignment, live loaded stem seal and locking handles.

Ported 3 & 4-way ball valves offering excellent versatility for mixing and diverting applications.

- ISO 5211 Secure Mount actuator top flange

### 130 SERIES

| ¼" through 2" | 3 Way |
|  | Standard Port |

| Materials | Stainless Steel |
| Pressure Ratings | ¼"-1¼": 1000 psi WOG |
| | 1½"-2": 800 psi WOG |

### 230 & 240 SERIES

| ¼" through 4" | 230 - 3 Way 240 - 4 Way |
| Full Port |

| Materials | Stainless Steel & Carbon Steel |
| Pressure Ratings | ¼"-1": 1000 psi WOG |
| | 1½"-4": 800 psi WOG |

### MULTI-PORT FLANGED SERIES

| Full Port |

| MPF150 up to 10" MPF300 up to 6" |

| Materials | Stainless Steel & Carbon Steel |
| Pressure Ratings | MPF150: ASME Class 150 MPF300: ASME Class 300 |

- End connections designed to ASME 16.5

---

### MULTI-PORT – STANDARD END CONNECTIONS

S85 SERIES

- **Body**: 2 Piece
- **Full Port**: ½” through 3”
- **Materials**: Stainless Steel

**Pressure Ratings**: ½”-3”: 1000 psi WOG/150psi WSG

Designed for ease of automation, features include live loaded Smart Stem seals through 2”, anti-static protection, replaceable seats and seals, and safety latch handles.

- ISO 5211 Secure Mount actuator top flange

S80 SERIES

- **Body**: 2 Piece
- **Full Port**: ¼” through 4”
- **Materials**: Stainless Steel

**Pressure Ratings**: ¼”-4”: 1000 psi WOG/150psi WSG

Series S80 ball valves have been designed to meet the needs of the chemical, textile and process industries. An economical full port valve featuring adjustable stem packing, safety latch handles, and optional oval handles.

- Optional seal welded body

S70 & S90 SERIES

- **Body**: 2 Piece
- **Standard Port**: ¼” through 3”
- **Materials**: S70 Stainless Steel
  - **Pressure Ratings**: ¼”-1”: 2000 psi WOG
  - **Ratings**: 1¼”-2”: 1500 psi WOG
  - **Ratings**: 2½”-3”: 1000 psi WOG
  - **Ratings**: 150psi WSG

An economical solution for high pressure applications in the process industry. Features include adjustable stem packing, integrally cast actuator mounting pad, safety latch handles, and optional oval handles.

- Can be furnished Fire safe to API 607

S20 SERIES

- **Body**: 1 Piece
- **Reduced Port**: ¼” through 2”
- **Materials**: Stainless Steel

**Pressure Ratings**: ¼”-2”: 2000 psi WOG/150psi WSG

One piece body design supplies maximum structural strength while reducing leak paths. Features include live loaded stem seals, safety latch handles, and optional oval handles.

S40 SERIES

- **Body**: 1 Piece
- **Reduced Port**: ¼” through 2”
- **Materials**: Stainless Steel

**Pressure Ratings**: ¼”-2”: 1000 psi WOG/150psi WSG

An economical, compact, one piece body design that supplies maximum structural strength while reducing leak paths. Features include low operating torque and safety latch handles. Optional oval and wing handles are available.
**THREADING VALVES** continued

**HP, 3HP, & HX SERIES**

**INSTRUMENTATION VALVES**

- **3 Piece Body** ¼” through 1”
- **Materials** Stainless Steel
- **Pressure Ratings**
  - HP: 6000 psi WOG
  - HX: 10,000 psi WOG
  - 3HP: 6000 psi WOG
- **End Connections** NPT Threaded

**S51 SERIES**

**COMMERCIAL UTILITY VALVES**

- **2 Piece Body** ¼” through 4”
- **Materials** Brass
- **Pressure Ratings**
  - ¼”-2”: 600 psi WOG
  - ½”-4”: 400 psi WOG
  - ¼”-4”: 150 psi WSP
- **End Connections** NPT Threaded

**V-CONTROL CHARACTERIZED V-PORT BALLS**

With characterized V-ports, slotted ports or custom ports, V-Control Ball Valves provide accurate flow control. Available in 3-Piece and Flanged bodies, V-Control valves offer superior rangeability, repeatability and high flow capacity. These quarter turn valves are easily automated and make an ideal control element in process piping systems.

**CHARACTERIZED CONTROL**

When combined with Flow-Tek’s line of Pneumatic and Electric Actuators and controls, the V-Control delivers exceptional performance.
**Valve Sizes**

**¼” - 10”**

**Available for**

- Triad, 7/8000, S85, F15/F30, RF15/RF30, S7000

**Media Containment Units**

- Designed to prevent costly downtime and provide double stem sealing.
- Button-head check valve for injection of a sealing agent can be added.
- Designed for both automated and manual service, the MCU is easily installed in the field onto existing Flow-Tek ball valves.

**CRYOGENIC SERVICE**

- **Full Port Flanged** ½” - 12”
- **Full Port Triad** ¼” - 4”
- **Standard Port Triad** ¼” - 2½”

**Temperature**

- Service to -425°F

**Pressure Ratings**

- **Carbon Steel** Up to 505 psi @ 750°F
- **Stainless Steel** Up to 425 psi @ 750°F

**Used in**

- In the production, transportation and storage of liquefied gases, these specially designed valves have extended stems and bonnets that position the packing above the cryogenic fluid.
- Some key features include high-density TFM 1600 seat and seals and live loaded stem packing.
- Valves are unidirectional with vent holes in the stem slot and upstream face of the ball.
  - All valves are permanently marked with a flow direction arrow.
  - Available in a shorter stem/bonnet, low temperature version.
  - ISO 5211 (½”-2”) actuator top flange

**SERIES 19 SEGMENTED**

- **1 Piece Body** 1”-12”
- **Materials** Stainless Steel & Carbon Steel
- **ASME Class** 150, 300 & 600

**A versatile Segmented Ball Valve designed for throttling or on-off applications in various industries including pulp & paper, chemical, power, oil & gas, and mining.**

- The valve features a characterized ball segment for high range-ability with splined stem connection for precise control, maintenance friendly segment-stem assembly, low friction shaft and thrust bearings for longer life, integral actuator mounting pads, and interchangeable seats. Special body and trim materials available.

**MEDIA CONTAINMENT**

**Valve Sizes** ¼” - 10”

**STEAM ISOLATION**

**Valves Sizes:** ½” through 12”

- Full port flanged ball valves are available for low temperature steam distribution and isolation service. Carbon steel, ASME Class 300 valve sizes 4” and larger are offered with optional bypass, feature quarter turn operation, positive shutoff and live loaded packing.
ELECTRIC & PNEUMATIC ACTUATORS

PNEUMATIC – DOUBLE ACTING & SPRING RETURN
Output Torque: 50 to 44,130 lb-in at 80 psi
Rack & pinion, opposed-piston pneumatic actuators are self contained with integral internal porting. Units are suitable for both on/off and throttling applications.
- Double Acting Rotation: 90°, 135°, 180° & Spring Return Rotation: 90°
- Supply pressure up to 145 psi (10 bar)
- Temperature Range: -20°F (-29°C) to +200°F (+95°C)

ELECTRIC
Output Torque: 300 to 18,000 lb-in
This design offers greatly reduced space requirements, lighter weight and ease of installation and maintenance.
- Designed to meet NEMA 4, 4x (IP 65) or NEMA 4,4x,7,9
- 120 or 220 VAC single phase permanent split-capacitor reversible induction UL listed motor, 24 VDC motor optional
- 90° reversible rotation
- Temperature Range: -40°F (-40°C) to +150°F (+65°C)

FTG SERIES Worm Gear Operators for ¼” through 12” Ball Valves
Output Torque.................................................................5,310 to 70,000 lb-in
Options:... Locking Device, Chain Wheels, Horizontal Flag Indicator, 2” Square Input Drive Nut, Grease Fitting & Flow Pattern Indicators for Multiport Valves
Feature a ductile iron housing, aluminum bronze gear segment and one piece steel worm gear input shaft with tapered roller bearings on both ends. Adjustable travel stops provide precise adjustment in both open and closed positions. Housings are sealed and weather proof to fully isolate internal parts from atmospheric conditions.

SRH SERIES Spring Return Handles (Deadman Handle) for ¼” through 2” Ball Valves
Spring Return (Deadman) Handles are manufactured from heavy duty stainless steel components to withstand frequent daily use in refueling, sampling, drains, and other OSHA applications that require positive safety closure of a manual valve. Each SRH Handle has a standard locking device.
Available in three sizes that mount directly to the rugged investment cast ISO 5211 mounting pads on compatible Flow-Tek full or standard port ball valves.
